License file

DESCRIPTION

Angular 6, 7, 8+ **User Idle / Session Timeout** detector service. It's a pretty simple **user idle / session timeout** detector for Angular. You can use this for session timeout, user idle restriction after a period of time etc..

- [Learn Angular Tutorials](<http://bearnithi.com/>)
- [Angular Tree Component](<https://www.npmjs.com/package/bn-ng-tree-lib>)
- [Angular PDF Viewer](<https://www.npmjs.com/package/bn-ng-pdf-viewer>)

INSTALLATION

```
``sh
npm install bn-ng-idle
``
```

How to use angular idle detector in your angular app

API List

1. **startWatching(timeoutSeconds)** - This method is used to initiate the idle detector in angular. `timeoutSeconds` is a parameter, number of seconds to emit the idle event. This method returns an observable which you can subscribe to detect the idleness of the user.
2. **resetTimer()** - This method is used to reset the timer
3. **stopTimer()** - This method is used to stop the idle detector.

Sample Code for Angular User Idle

app.module.ts - Import the BnNgIdleService in your module

```
``typescript
import { BrowserModule } from '@angular/platform-browser';
import { NgModule } from '@angular/core';

import { AppComponent } from './app.component';
import { BnNgIdleService } from 'bn-ng-idle'; // import bn-ng-idle service
```

```
@NgModule({
  declarations: [
    AppComponent
  ],
  imports: [
    BrowserModule
  ],
  providers: [BnNgIdleService], // add it to the providers of your module
  bootstrap: [AppComponent]
})
export class AppModule { }
```

...

app.component.ts - Import the BnNgIdleService in your component

```
``typescript
import { Component } from '@angular/core';
import { BnNgIdleService } from 'bn-ng-idle'; // import it to your component
```

```
@Component({
  selector: 'app-root',
  templateUrl: './app.component.html',
  styleUrls: ['./app.component.css']
})
export class AppComponent {

  constructor(private bnIdle: BnNgIdleService) {

  }
```

```
// initiate it in your component OnInit
ngOnInit(): void {
  this.bnIdle.startWatching(60).subscribe((isTimedOut: boolean) => {
    if (res) {
      console.log('session expired');
    }
  });
}
}
...

```

In the above example, I have invoked the `startWatching(timeOutSeconds)` method with 60 seconds (1 minute) and subscribed to the observable, once the user is idle for one minute then the subscribe method will get invoked with the `isTimedOut` parameter's value (which is a boolean) as `true`.

By checking whether the `isTimedOut` is true or not, you can show your session timeout dialog or message. For brevity, I just logged the message to the console.

VERSION

1.0.0 - Angular 6 user idle detector

syslog-client

[[Build Status]](<https://travis-ci.org/paulgrove/node-syslog-client.svg?branch=master>)](<https://travis-ci.org/paulgrove/node-syslog-client>) [[Code Climate]](<https://codeclimate.com/github/paulgrove/node-syslog-client/badges/gpa.svg>)](<https://codeclimate.com/github/paulgrove/node-syslog-client>) [[Test Coverage]](<https://codeclimate.com/github/paulgrove/node-syslog-client/badges/coverage.svg>)](<https://codeclimate.com/github/paulgrove/node-syslog-client/coverage>) [[Issue Count]](https://codeclimate.com/github/paulgrove/node-syslog-client/badges/issue_count.svg)](<https://codeclimate.com/github/paulgrove/node-syslog-client>)

This module is a pure JavaScript implementation of the [BSD Syslog Protocol RFC 3164][1] and the [Syslog Protocol RFC 5424][2].

This module is installed using [node package manager (npm)][3]:

```
...  
npm install syslog-client  
...
```

It is loaded using the `require()` function:

```
...js  
var syslog = require("syslog-client");  
...
```

TCP or UDP clients can then be created to log messages to remote hosts.

```
...js  
var client = syslog.createClient("127.0.0.1");  
  
client.log("example message");  
...
```

[1]: <https://www.ietf.org/rfc/rfc3164.txt>

[2]: <https://tools.ietf.org/html/rfc5424>

[3]: <https://npmjs.org>

Constants

The following sections describe constants exported and used by this module.

syslog.Transport

This object contains constants for all valid values for the `transport` attribute passed to the `options` argument for the `createClient()` function. The following constants are defined in this object:

```
* `Tcp`  
* `Udp`
```

syslog.Facility

This object contains constants for all valid values for the `facility` attribute passed to the `options` argument for the `log()` method on the `Client` class. The following constants are defined in this object:

```
* `Kernel` - 0  
* `User` - 1  
* `System` - 3  
* `Audit` - 13  
* `Alert` - 14  
* `Local0` - 16  
* `Local1` - 17  
* `Local2` - 18  
* `Local3` - 19  
* `Local4` - 20  
* `Local5` - 21  
* `Local6` - 22
```

* `Local7` - 23

syslog.Severity

This object contains constants for all valid values for the `severity` attribute passed to the `options` argument for the `log()` method on the `Client` class. The following constants are defined in this object:

* `Emergency` - 0
* `Alert` - 1
* `Critical` - 2
* `Error` - 3
* `Warning` - 4
* `Notice` - 5
* `Informational` - 6
* `Debug` - 7

Using This Module

All messages are sent using an instance of the `Client` class. This module exports the `createClient()` function which is used to create instances of the `Client` class.

syslog.createClient([target], [options])

The `createClient()` function instantiates and returns an instance of the `Client` class:

```
```js
// Default options
var options = {
 syslogHostname: os.hostname(),
 transport: syslog.Transport.Udp,
 port: 514
};

var client = syslog.createClient("127.0.0.1", options);
```
```

The optional `target` parameter defaults to `127.0.0.1`. The optional `options` parameter is an object, and can contain the following items:

* `port` - TCP or UDP port to send messages to, defaults to `514`
* `syslogHostname` - Value to place into the `HOSTNAME` part of the `HEADER` part of each message sent, defaults to `os.hostname()`
* `tcpTimeout` - Number of milliseconds to wait for a connection attempt to the specified Syslog target, and the number of milliseconds to wait for TCP acknowledgements when sending messages using the TCP transport, defaults to `10000` (i.e. 10 seconds)
* `transport` - Specify the transport to use, can be either `syslog.Transport.Udp` or `syslog.Transport.Tcp`, defaults to `syslog.Transport.Udp`
* `facility` - set default for `client.log()`; default is `syslog.Facility.Local0`
* `severity` - set default for `client.log()`; default is `syslog.Severity.Informational`
* `rfc3164` - set to false to use [RFC 5424](https://tools.ietf.org/html/rfc5424) syslog header format; default is true for the older [RFC 3164](https://tools.ietf.org/html/rfc3164) format.
* `appName` - set the APP-NAME field when using `rfc5424`; default uses `process.title`
* `dateFormatter` - change the default date formatter when using `rfc5424`; interface: `function(date) { return string; }`; defaults to `function(date) { return date.toISOString(); }`

client.on("close", callback)

The `close` event is emitted by the client when the clients underlying TCP or UDP socket is closed.

No arguments are passed to the callback.

The following example prints a message to the console when a clients underlying TCP or UDP socket is closed:

```
```js
client.on("close", function () {
 console.log("socket closed");
});
```
```

client.on("error", callback)

The `error` event is emitted by the client when the clients underlying TCP or UDP socket emits an error.

The following arguments will be passed to the `callback` function:

- * `error` - An instance of the `Error` class, the exposed `message` attribute will contain a detailed error message.

The following example prints a message to the console when an error occurs with a clients underlying TCP or UDP socket:

```
'''js
client.on("error", function (error) {
  console.error(error);
});
'''
```

```
## client.close()
```

The `close()` method closes the clients underlying TCP or UDP socket. This will result in the `close` event being emitted by the clients underlying TCP or UDP socket which is passed through to the client, resulting in the client also emitting a `close` event.

The following example closes a clients underlying TCP or UDP socket:

```
'''js
client.close();
'''
```

```
## client.log(message, [options], [callback])
```

The `log()` method sends a Syslog message to a remote host.

The `message` parameter is a string containing the message to be logged.

The optional `options` parameter is an object, and can contain the following items:

- * `facility` - Either one of the constants defined in the `syslog.Facility` object or the facility number to use for the message, defaults to `syslog.Facility.Local0` (see `syslog.createClient()`)
- * `severity` - Either one of the constants defined in the `syslog.Severity` object or the severity number to use for the message, defaults to `syslog.Severity.Informational` (see `syslog.createClient()`)
- * `rfc3164` - set to false to use [RFC 5424](https://tools.ietf.org/html/rfc5424) syslog header format; default is true for the older [RFC 3164](https://tools.ietf.org/html/rfc3164) format.
- * `timestamp` - Optional Javascript Date() object to back-date the message.
- * `msgid` - Optional [RFC 5424](https://tools.ietf.org/html/rfc5424) message-id.

The `callback` function is called once the message has been sent to the remote host, or an error occurred. The following arguments will be passed to the `callback` function:

- * `error` - Instance of the `Error` class or a sub-class, or `null` if no error occurred

Each message sent to the remote host will have a newline character appended to it, if one is not already appended. Care should be taken to ensure newline characters are not embedded within the message passed to this method (i.e. not appearing at the end), as this may cause some syslog relays/servers to incorrectly parse the message.

The following example sends a message to a remote host:

```
'''js
var options = {
  facility: syslog.Facility.Daemon,
  severity: syslog.Severity.Critical
};

var message "something is wrong with this daemon!";

client.log(message, options, function(error) {
  if (error) {
    console.error(error);
  } else {
    console.log("sent message successfully");
  }
});
'''
```

Example Programs

Example programs are included under the modules `example` directory.

Running tests and test coverage

Tests can be run with:

```
...
npm test
...
```

Install dev dependencies before running test coverage:

```
...
npm install --dev
npm run coverage
...
```

Coverage should be generated into `coverage/lcov-report/index.html`.

Changes

Version 1.0.0 - 31/07/2015

- * Initial release

Version 1.0.1 - 31/07/2015

- * Correct typo in README.md

Version 1.0.2 - 31/07/2015

- * Correct typo in README.md :(

Version 1.0.3 - 01/08/2015

- * Correct typo in README.md :(

Version 1.0.4 - 08/08/2015

- * Transport error events are not propagated to an error event in the Syslog client

Version 1.0.5 - 22/10/2015

- * Redundant release

Version 1.0.6 - 22/10/2015

- * Slight formatting error in the README.md file

Version 1.0.7 - 08/02/2016

- * Remove debug `console.dir()` statement accidentally left in code

Version 1.0.8 - 26/08/2016

- * Variable `key` in `_expandConstantObject()` missing `var` declaration

Version 1.0.9 - 27/10/2016

- * Added mocha test framework
- * Added istanbul test coverage
- * Added tests for aprox 89% coverage
- * Fixed bug where transports where not being reused
- * Fixed bug where some connections would not `close()`
- * Made `options` in `.log()` optional as per existing documentation
- * Make `cb` in `.log()` optional and update documentation
- * Fixed bug where `error` event and `.log` callback wouldn't predictably receive error
- * `close` event is now always fired when `.close()` is called, regardless of open connection
- * New maintainer Paul Grove
- * Updated License
- * Travis-CI and codeclimate build automation and badges
- * Code linted using eslint

Version 1.0.10 - 27/10/2016

- * No changes, issues with publishing to npm

Version 1.0.11 - 14/11/2016

- * Fix miscalculation of PRI for Emergency and Kernel Facility/Severity

Version 1.1.0 - 18/05/2017

- * Fix issue resolving IP class from hostname
- * Call log callback asynchronously, preventing issues when closing in that callback
- * Support for RFC 5424
- * Fix erroneous space after PRI

```

Very minimal utils that are required in order to write reasonable JS-only crypto module.

Usage

```
```js
const utils = require('minimalistic-crypto-utils');

utils.toArray('abcd', 'hex');
utils.encode([1, 2, 3, 4], 'hex');
utils.toHex([1, 2, 3, 4]);
```

copy-to
=====

[[Build Status]](<https://travis-ci.org/node-modules/copy-to.svg?branch=master>)](<https://travis-ci.org/node-modules/copy-to>)

copy an object's properties to another one, include property, getter and setter.

Install

```
...  
npm install copy-to  
...
```

Usage

```
```js  
copy(src).to(des);
copy(src).toCover(des);
copy(src).override(des);

copy(src).pick('propertyName1', 'propertyName2').to(des);
copy(src).pick('propertyName1', 'propertyName2').toCover(des);
copy(src).pick('propertyName1', 'propertyName2').override(des);

copy(src).and(other).to(des);
copy(src).and(other).toCover(des);
copy(src).and(second).and(third).to(des);

copy(src).and(other).pick('propertyName1', 'propertyName2').to(des);
copy(src).and(other).pick('propertyName1', 'propertyName2').toCover(des);
copy(src).and(second).and(third).pick('propertyName1', 'propertyName2').to(des);
```
```

It won't copy access(getter / setter) by default, if you want to copy them, please use:

```
```js  
copy(src).withAccess().and(other).to(des);
```
```

Example

```
```js  
var copy = require('copy-to');

var src = {
 _name: 'foo',
 set name(val) {
 this._name = val;
 },
 get name() {
 return this._name;
 },
 show: function () {
 console.log(this._name);
 }
};

var des = {
 _name: 'bar'
};

copy(src).to(des);
copy(src).toCover(des);
copy(src).pick('_name', 'name').to(des);
copy(src).pick('_name', 'name').toCover(des);
```
```

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the

appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

```
# backo

Simple exponential backoff because the others seem to have weird abstractions.

## Installation

'''
$ npm install backo
'''

## Options

- `min` initial timeout in milliseconds [100]
- `max` max timeout [10000]
- `jitter` [0]
- `factor` [2]

## Example

'''js
var Backoff = require('backo');
var backoff = new Backoff({ min: 100, max: 20000 });

setTimeout(function(){
  something.reconnect();
}, backoff.duration());

// later when something works
backoff.reset()
'''

License file

```
# koa-response-time

[[Greenkeeper badge](https://badges.greenkeeper.io/koajs/response-time.svg)](https://greenkeeper.io/)

X-Response-Time middleware for Koa.

## Installation

```js
$ npm install koa-response-time
```

## Usage

Basic usage:

```js
const Koa = require('koa');
const responseTime = require('koa-response-time');
const app = new Koa();

app.use(responseTime());
```

If you need response high resolution in nano time, set `hrtime` option to `true`:

```js
app.use(responseTime({ hrtime: true }));
```

Sample response header with `hrtime = false` (default):

```
X-Response-Time: 153ms
```

Sample response header with `hrtime = true`:

```
X-Response-Time: 153.123581ms
```

## Note

Best to `.use()` at the `_top_` before any other middleware,
to wrap all subsequent middleware.

## License

MIT
```

only

Return whitelisted properties of an object.

Installation

\$ npm install only

API

An array or space-delimited string may be given:

```
```js
var obj = {
 name: 'tobi',
 last: 'holowaychuk',
 email: 'tobi@learnboost.com',
 _id: '12345'
};

var user = only(obj, 'name last email');
```
```

yields:

```
```js
{
 name: 'tobi',
 last: 'holowaychuk',
 email: 'tobi@learnboost.com'
}
```
```

# hmac-drbg
[![Build Status](https://secure.travis-ci.org/indutny/hmac-drbg.svg)](http://travis-ci.org/indutny/hmac-drbg)
[![NPM version](https://badge.fury.io/js/hmac-drbg.svg)](http://badge.fury.io/js/hmac-drbg)
```

JS-only implementation of [HMAC DRBG][0].

Usage

```
```js
const DRBG = require('hmac-drbg');
const hash = require('hash.js');

const d = new DRBG({
 hash: hash.sha256,
 entropy: '0123456789abcdef',
 nonce: '0123456789abcdef',
 pers: '0123456789abcdef' /* or `null` */
});

d.generate(32, 'hex');
```
```

[download-url]: https://npmjs.org/package/co-body
```

Parse request bodies with generators inspired by [Raynos/body](<https://github.com/Raynos/body>).

Installation

```
``bash
$ npm install co-body
``
```

Options

- `'limit'` number or string representing the request size limit (1mb for json and 56kb for form-urlencoded)
- `'strict'` when set to `'true'`, JSON parser will only accept arrays and objects; when `'false'` will accept anything `'JSON.parse'` accepts. Defaults to `'true'`. (also `'strict'` mode will always return object).
- `'queryString'` an object of options when parsing query strings and form data. See [qs](<https://github.com/hapijs/qs>) for more information.
- `'returnRawBody'` when set to `'true'`, the return value of `'co-body'` will be an object with two properties: `{ parsed: /* parsed value */, raw: /* raw body */ }`.
- `'jsonTypes'` is used to determine what media type `**co-body**` will parse as `**json**`, this option is passed directly to the [type-is](<https://github.com/jshttp/type-is>) library.
- `'formTypes'` is used to determine what media type `**co-body**` will parse as `**form**`, this option is passed directly to the [type-is](<https://github.com/jshttp/type-is>) library.
- `'textTypes'` is used to determine what media type `**co-body**` will parse as `**text**`, this option is passed directly to the [type-is](<https://github.com/jshttp/type-is>) library.

more options available via [raw-body](<https://github.com/stream-utils/raw-body#getrawbodystream-options-callback>):

Example

```
``js
// application/json
var body = await parse.json(req);

// explicit limit
var body = await parse.json(req, { limit: '10kb' });

// application/x-www-form-urlencoded
var body = await parse.form(req);

// text/plain
var body = await parse.text(req);

// either
var body = await parse(req);

// custom type
var body = await parse(req, { textTypes: ['text', 'html'] });
``
```

Koa

This lib also supports `'ctx.req'` in Koa (or other libraries), so that you may simply use `'this'` instead of `'this.req'`.

```
``js
```

```
// application/json
var body = await parse.json(this);

// application/x-www-form-urlencoded
var body = await parse.form(this);

// text/plain
var body = await parse.text(this);

// either
var body = await parse(this);
...

Guid Typescript

Guid Typescript is library that let you generate guid code

Instalation and usage

Instalation

...

npm i guid-typescript --save

...

Basic usage

```typescript

import { Guid } from "guid-typescript";

export class Example {

public id: Guid;

constructor() {

    this.id = Guid.create(); // ==> b77d409a-10cd-4a47-8e94-b0cd0ab50aa1

}

}

...

## Props and Methods

| Method/Prop | Description | Test | Status |

|---|---|---|---|

| static isGuid (guid: any): boolean | Check if value is a guid code | OK | Ready |

| static create ( ): Guid | Create a new guid | OK | Ready |

| static createEmpty ( ): Guid | Create a guid empty | OK | Ready |

| static parse (guid: string): Guid | Given a guid code in string format, so create a guid instance | OK | Ready |

| static raw ( ): string | Create a guid code in string format | OK | Ready |

| equals (other: Guid): boolean | Compare a guid code | OK | Ready |

| isEmpty ( ): boolean | Validate if a guid is empty | OK | Ready |

| toString ( ): string | Parse a guid instance to string format | OK | Ready |

| toJSON ( ): any | Parse to JSON format | OK | Ready |

// ES3/ES5 implementation of the Khronos Typed Array Specification

// Ref: <http://www.khronos.org/registry/typedarray/specs/latest/>

// Date: 2011-02-01

//

// Variations:

// \* Allows typed\_array.get/set() as alias for subscripts (typed\_array[])

# component-bind@1.0.0

## License

MIT\*

## Repository

<https://github.com/component/bind>

## License file

```
bind

Function binding utility.

Installation

...

$ component install component/bind
...

API

- [bind(obj, fn)](#bindobj-fn)
- [bind(obj, fn, ...)](#bindobj-fn-)
- [bind(obj, name)](#bindobj-name)

bind(obj, fn)
should bind the function to the given object.

```js
var tobi = { name: 'tobi' };

function name() {
  return this.name;
}

var fn = bind(tobi, name);
fn().should.equal('tobi');
```

bind(obj, fn, ...)
should curry the remaining arguments.

```js
function add(a, b) {
  return a + b;
}

bind(null, add)(1, 2).should.equal(3);
bind(null, add, 1)(2).should.equal(3);
bind(null, add, 1, 2)().should.equal(3);
```

bind(obj, name)
should bind the method of the given name.

```js
var tobi = { name: 'tobi' };

tobi.getName = function() {
  return this.name;
};

var fn = bind(tobi, 'getName');
fn().should.equal('tobi');
```

## Publisher

dead\_horse

## Repository

<https://github.com/node-modules/cache-content-type>

## License file

## cache-content-type

The same as [mime-types](https://github.com/jshttp/mime-types)'s contentType method, but with result cached.

### Install

```
``bash
npm i cache-content-type
``
```

### Usage

```
``js
const getType = require('cache-content-type');
const contentType = getType('html');
assert(contentType === 'text/html; charset=utf-8');
``
```

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the

attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License. You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## License file

```
isarray

`Array#isArray` for older browsers.

[![build status](https://secure.travis-ci.org/juliangruber/isarray.svg)](http://travis-ci.org/juliangruber/isarray)
[![downloads](https://img.shields.io/npm/dm/isarray.svg)](https://www.npmjs.org/package/isarray)

[![browser support](https://ci.testling.com/juliangruber/isarray.png)](https://ci.testling.com/juliangruber/isarray)

Usage

```js
var isArray = require('isarray');

console.log(isArray([])); // => true
console.log(isArray({})); // => false
```

Installation

With [npm](https://npmjs.org) do

```bash
$ npm install isarray
```

Then bundle for the browser with
[browserify](https://github.com/substack/node-browserify).

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

##### 2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any

risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright (c) 2015-2018 Google, Inc., Netflix, Inc., Microsoft Corp. and contributors

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

Fast elliptic-curve cryptography in a plain javascript implementation.

NOTE: Please take a look at <http://safecurves.cr.yp.to/> before choosing a curve for your cryptography operations.

### ## Incentive

ECC is much slower than regular RSA cryptography, the JS implementations are even more slower.

### ## Benchmarks

```
```bash
$ node benchmarks/index.js
Benchmarking: sign
elliptic#sign x 262 ops/sec Â±0.51% (177 runs sampled)
eccjs#sign x 55.91 ops/sec Â±0.90% (144 runs sampled)
-----
Fastest is elliptic#sign
=====
Benchmarking: verify
elliptic#verify x 113 ops/sec Â±0.50% (166 runs sampled)
eccjs#verify x 48.56 ops/sec Â±0.36% (125 runs sampled)
-----
Fastest is elliptic#verify
=====
Benchmarking: gen
elliptic#gen x 294 ops/sec Â±0.43% (176 runs sampled)
eccjs#gen x 62.25 ops/sec Â±0.63% (129 runs sampled)
-----
Fastest is elliptic#gen
=====
Benchmarking: ecdh
elliptic#ecdh x 136 ops/sec Â±0.85% (156 runs sampled)
-----
Fastest is elliptic#ecdh
=====
```
```

### ## API

#### ### ECDSA

```
```javascript
var EC = require('elliptic').ec;

// Create and initialize EC context
// (better do it once and reuse it)
var ec = new EC('secp256k1');

// Generate keys
var key = ec.genKeyPair();

// Sign the message's hash (input must be an array, or a hex-string)
var msgHash = [ 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 ];
var signature = key.sign(msgHash);

// Export DER encoded signature in Array
var derSign = signature.toDER();

// Verify signature
```

```

console.log(key.verify(msgHash, derSign));

// CHECK WITH NO PRIVATE KEY

var pubPoint = key.getPublic();
var x = pubPoint.getX();
var y = pubPoint.getY();

// Public Key MUST be either:
// 1) '04' + hex string of x + hex string of y; or
// 2) object with two hex string properties (x and y); or
// 3) object with two buffer properties (x and y)
var pub = pubPoint.encode('hex'); // case 1
var pub = { x: x.toString('hex'), y: y.toString('hex') }; // case 2
var pub = { x: x.toBuffer(), y: y.toBuffer() }; // case 3
var pub = { x: x.toArrayLike(Buffer), y: y.toArrayLike(Buffer) }; // case 3

// Import public key
var key = ec.keyFromPublic(pub, 'hex');

// Signature MUST be either:
// 1) DER-encoded signature as hex-string; or
// 2) DER-encoded signature as buffer; or
// 3) object with two hex-string properties (r and s); or
// 4) object with two buffer properties (r and s)

var signature = '3046022100...'; // case 1
var signature = new Buffer('...'); // case 2
var signature = { r: 'b1fc...', s: '9c42...' }; // case 3

// Verify signature
console.log(key.verify(msgHash, signature));
...

### EdDSA

```javascript
var EdDSA = require('elliptic').eddsa;

// Create and initialize EdDSA context
// (better do it once and reuse it)
var ec = new EdDSA('ed25519');

// Create key pair from secret
var key = ec.keyFromSecret('693e3c...'); // hex string, array or Buffer

// Sign the message's hash (input must be an array, or a hex-string)
var msgHash = [0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10];
var signature = key.sign(msgHash).toHex();

// Verify signature
console.log(key.verify(msgHash, signature));

// CHECK WITH NO PRIVATE KEY

// Import public key
var pub = '0a1af638...';
var key = ec.keyFromPublic(pub, 'hex');

// Verify signature
var signature = '70bed1...';
console.log(key.verify(msgHash, signature));
...

ECDH

```javascript
var EC = require('elliptic').ec;
var ec = new EC('curve25519');

// Generate keys
var key1 = ec.genKeyPair();
var key2 = ec.genKeyPair();

var shared1 = key1.derive(key2.getPublic());
var shared2 = key2.derive(key1.getPublic());

console.log('Both shared secrets are BN instances');
console.log(shared1.toString(16));
console.log(shared2.toString(16));
...

three and more members:

```

```

```:javascript
var EC = require('elliptic').ec;
var ec = new EC('curve25519');

var A = ec.genKeyPair();
var B = ec.genKeyPair();
var C = ec.genKeyPair();

var AB = A.getPublic().mul(B.getPrivate())
var BC = B.getPublic().mul(C.getPrivate())
var CA = C.getPublic().mul(A.getPrivate())

var ABC = AB.mul(C.getPrivate())
var BCA = BC.mul(A.getPrivate())
var CAB = CA.mul(B.getPrivate())

console.log(ABC.getX().toString(16))
console.log(BCA.getX().toString(16))
console.log(CAB.getX().toString(16))
```:

```

NOTE: `derive()` returns a `[BN][1]` instance.

Supported curves

Elliptic.js support following curve types:

- * Short Weierstrass
- * Montgomery
- * Edwards
- * Twisted Edwards

Following curve 'presets' are embedded into the library:

```

* `secp256k1`
* `p192`
* `p224`
* `p256`
* `p384`
* `p521`
* `curve25519`
* `ed25519`

```

NOTE: That `curve25519` could not be used for ECDSA, use `ed25519` instead.

Implementation details

ECDSA is using deterministic `k` value generation as per [RFC6979][0]. Most of the curve operations are performed on non-affine coordinates (either projective or extended), various windowing techniques are used for different cases.

All operations are performed in reduction context using `[bn.js][1]`, hashing is provided by `[hash.js][2]`

Related projects

* `[ecrypto][3]`: isomorphic implementation of ECDSA, ECDH and ECIES for both browserify and node (uses `elliptic` for browser and `[secp256k1-node][4]` for node)

```
# isarray

`Array#isArray` for older browsers.

[![build status](https://secure.travis-ci.org/juliangruber/isarray.svg)](http://travis-ci.org/juliangruber/isarray)
[![downloads](https://img.shields.io/npm/dm/isarray.svg)](https://www.npmjs.org/package/isarray)

[![browser support](https://ci.testling.com/juliangruber/isarray.png)](https://ci.testling.com/juliangruber/isarray)

## Usage

```js
var isArray = require('isarray');

console.log(isArray([])); // => true
console.log(isArray({})); // => false
```

## Installation

With [npm](http://npmjs.org) do

```bash
$ npm install isarray
```

Then bundle for the browser with
[browserify](https://github.com/substack/browserify).

With [component](http://component.io) do

```bash
$ component install juliangruber/isarray
```
